

ABSTRACT

This invention relates to a delivery system which comprises a topical skin care agent, a top layer and a bottom layer where at least one of said top layer and said  
5 bottom layer comprises an apertured film having protuberances therein, where said top layer and said bottom layer are attached to eachother leaving a pouch between said top layer and said bottom layer, where said protuberances of said apertured film face said pouch, and where said pouch contains said topical skin care agent.
